

# The FINGER LAKES™

## FRESH AIR

### Service™

**The hot, damp confines of your vehicle's air conditioning system could be a breeding ground for bacteria and fungi. The musty odor emitted from your ventilation system may cause more than an inconvenience. Prolonged exposure can cause some to develop allergy symptoms, such as difficulty breathing, sneezing or a running nose. Air fresheners may mask the smell, but they won't eliminate the source of the odor.**

**Enhance your driving experience  
with the Fresh Air of the  
Finger Lakes.**

★ EPA registered disinfectant keeps A/C evaporator and duct work clean inside without an annoying germicidal odor.

★ Provide a healthy environment - free from mold, mildew, fungi and bacteria with Finger Lakes Fresh Air Disinfectant.

★ The concentrated windshield washer additive freshens the air inside the vehicle while strengthening the cleaning power of your washer fluid.
