

# Castle<sup>®</sup> ZOOM<sup>™</sup>

## Hi Tech Performance Additive Features and Benefits

When used regularly will improve catalytic converter performance and reduce tailpipe emissions.

Restores lost engine performance by raising the octane rating of unleaded gasoline.

Can be used as a lead substitute.

Compatible with leaded gasoline.

Improves the performance of fuel system additives and cleaners.

Castle<sup>®</sup>

Contains MMT, an octane booster in use for over 35 years.

Prevents pinging caused by Octane Requirement Increase (ORI).

Compatible with other octane boosters such as MTBE and ethanol-blended gasoline.

Provides an immediate, measurable and sustainable increase in octane.

Compatible with alternate fuels such as gasohol and reformulated gasoline.
