

## TECHNICAL DATA SHEET

### RUSTEX Radiator Rust & Corrosion Inhibitor

**DESCRIPTION:** Rustex is a stabilizer and inhibitor that should be used in all automotive cooling systems. Rustex will neutralize the coolant of a radiator, preventing rust, corrosion and scale. Rustex leaves no oily film usually present in most other rust inhibitors. Rustex also works as a lubricant to the water pump. Can be used in all types of radiators including plastic. Rustex is a silicate based formula and should not be used in systems that are silicate free.

**USES:**           \*Auto       \*Truck       \*Bus           \*Farm Equipment  
                  \*Heavy Equipment   \*Fork Lifts

**DIRECTIONS:** 12 ounce bottles should be added to the cooling system every six months or 10,000 miles in an automotive applications.

**PACKAGING:** 8 oz                   24/case                   5 gallon                   pail  
                  12 oz                   24/case                   55 gallon                  drum

**CAUTION:**       When handling this product wear gloves and eye protection.  
                  This is a high pH product.

**SPECIFICATIONS:**

Color	blue	Flash Point	407°
Cleaning	excellent	Effect on Paint	none
Odor	none	pH	14
Density	1.1	Freeze Stable	yes
Degreasing	yes		

**PRODUCT #:** C0834  
                  C1204  
                  C1204-5  
                  C1204-55
