

## TECHNICAL DATA SHEET

### SQUEAL X

**DESCRIPTION:** Squeal X is designed for professional use. Its unique blend of chemicals is formulated to eliminate brake squeal. Squeal X is designed to be used on a new pad or disc, when the product can saturate from top to bottom.

**USES:** \*Auto \*Truck \*Bus

**DIRECTIONS:** New Pad:  
Shake can well. Spray pad to saturate, let dry and reapply. Allow pad to dry to touch before assembly (about 10-12 minutes).

Used Pad:  
Pad must be scuffed to allow penetration of Squeal X. Because of glazing of a used pad, Squeal X may not eliminate all of the squeal. It is necessary to saturate 100% of the pad.

**PACKAGING:** 2oz bottles                      12/case

**SPECIFICATIONS:**

|                  |           |
|------------------|-----------|
| Color            | dark gray |
| Specific Gravity | .79       |
| Flash Point      | -40°F TCC |
| Odor             | solvent   |

**PRODUCT #:** C0302
